

Using Student View in D2L

1. In D2L, select the course you intend to edit.
2. Select **Course Home** on the Navigation bar.

Select
Course
Home

3. Use Role Switch to enter Student View Mode. To do this, click the downward-facing triangle and select **Student** from the dropdown menu and then click **Change Role**.

Select
Student

- All materials are now shown as they would appear to your students. Use **Student View** to test release conditions and other restrictions.

Observe
Student
View

By following these steps, you should now be able to view your class from the perspective of the student. This is feature allows you to double check that everything is set up properly and release condition are working.
