Configuring basic quiz options in Canvas, Part 1

Instructors can configure several parameters for quizzes in Canvas to customize settings like Quiz Type, Allow Multiple Attempts, and more.

Click Quizzes on your Navigation Menu and then either create a New Quiz or click on an existing quiz.

Enter the basic parameters for your quiz such as Title and Instructions for students.

Choose a Quiz Type: Practice Quiz is a quiz with no grade attached to it. Graded Quiz is a standard quiz where student scores are automatically entered into the gradebook. Graded Survey gives students points simply for completing the quiz but not based on right/wrong answers. Ungraded Survey lets instructors solicit input from students without having a grade attached.

Choose which Assignment Group the quiz should belong to. You can add it to an existing group or create a new one, but all quizzes must belong to an assignment group.

Assignment Group
- ✓ Photography Challenges
- Weekly Quizzes
- Group Projects
- Final Portfolio

Shuffle Answers forces Canvas to randomize the order of individual answer choices on questions.

Shuffle Answers

You can specify a time limit, as well as give students the option of taking the quiz multiple times.

☑ Time Limit   30   Minutes

☑ Allow Multiple Attempts

Quiz Score to Keep   Average ▾

☑ Allowed Attempts   2

Instructors have the option of allowing students to see their quiz responses, and choose what data students see along with specifying when they see their answers.

☑ Let Students See Their Quiz Responses (Incorrect Questions Will Be Marked in Student Feedback)

☑ Only After Their Last Attempt

☑ Only Once After Each Attempt

☑ Let Students See The Correct Answers

☐ Only After Their Last Attempt
